**Set #1 Counts: 0 Measures:**

Your drill charts may not look exactly like this and some of these markings may not be on your particular practice field.

There is a painted (usually white) yard line every five yards.

There are 8 steps between yard lines. These are "8 to 5" steps.

Each small box is 1 step. Where you practice probably does not have every step marked, but there may be additional markings every 4 or 8 steps to help you find spots faster.
